

# Combination Treatment System

## Quad Tank

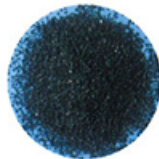

Kinetico Mach Series combination systems provide clear, clean, soft water throughout your entire home. When multiple contaminants are a concern, look to Kinetico's combination filters.

Harnessing the power of Mach technology and combining softening and filtration into one product, Mach Series combination systems deliver soft, filtered water at some of the highest flow rates.

### 1 MACROLITE®

### 2 CARBON

## MACH Series

## Other available media:

Carbon	removes chlorine, objectionable taste, odour and colour from water supply
Macrolite media	removes oxidized iron and suspended matter
Calcite	raises the pH of acidic water
Multimedia systems	offer a variety of filtration options within one system
Greensand	oxidizes and filters iron, manganese and hydrogen sulfide from water supply
Brim	removes iron and / or manganese from well water supply
Filter Ag	filter suspended matter down to 20 micron

# Drinking Water System

## K2
